MC Program – New User Guide

Installation

1. **Download the program from:** www.jying.ca/proj/mc/download.php

2. **Extract the contents from the zip file.**
    (If you've never used zip files before, search "How to extract zip files on Mac/Windows" in Google.)

3. **Locate the newly created folder that contains the contents of the zip file.**
    (This location depends on your computer's settings for extracting zip files. It will most likely be on your Desktop or Downloads folder.

4. **Move the folder to somewhere where it won't be deleted, such as your Desktop or Applications folder.**

5. **Create a shortcut for the file called "MC_Program.jar" and name the shortcut something along the lines of "MC Program."**
    (For Mac users, right-click the file and click "Make Alias" to create a shortcut.)

6. **Place the shortcut somewhere convenient – such as your Desktop or Applications folder.**

Using the Program

1. **Double-click the shortcut made earlier.**

2. **Set up your settings by clicking on the "Settings" button and then save them by clicking the "Save" button**

3. **Select a test from the list on the left side**

4. **Click "LET'S GO" and start practising**
